In claim 8, after line 7: the following was inserted

- - an actuating mechanism having a shaft positionable to force the first and second legs toward one another and frictionally engage the support member within the clamping bore. - -

In claim 11, line 1: "10" was replaced with - - 8 - -

In claim 12, line 1: "10" was replaced with - - 8 - -

In claim 15, line 1: "10" was replaced with - - 8 - -

Claims 10 and 16-31 were canceled.

The following claims were inserted:

- - 32. The surgical joint of claim 1 wherein the second clamping member further comprises a flexible clamping member having wing portions with clamping surfaces that define the socket and wherein as the actuating mechanism forces the second clamping member to frictionally engage the second support member, the wing portions flex such that the clamping surfaces engage the second support member. - -

- - 33. The surgical clamp of claim 12 wherein the second clamping member further comprises a flexible clamping member having wing portions with clamping surfaces that define the socket and wherein as the actuating mechanism forces the second clamping member to frictionally engage the second support member, the wing portions flex such that the clamping surfaces engage the second support member. - -

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
